SARAVANAN V

Data Engineering & Analytics | Python, SQL, Power BI | Gen AI & LLM Enablement | Cloud & Automation | Stakeholder Communication

Chennai, Tamil Nadu | +91 7305554885 | saravananv0004@gmail.com | linkedin.com/in/saravananv0004 | github.com/saravananv004

PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on internship experience across data engineering, analytics, and Gen AI-driven automation. Skilled in building data pipelines, cleaning and modelling data, and developing Power BI dashboards that translate raw data into actionable business insight. Experience applying Generative AI and LLM-based workflows to real business use cases, with exposure to agentic, multi-step automation. Strong communicator who partners with cross-functional and technical stakeholders, evaluates outputs for quality and accuracy, and delivers clear, structured reporting. Seeking to bring data engineering rigor, AI-enabled analytics skills, and a fast learning curve to a Data Engineering & Analytics team.

KEY SKILLS

- Data Engineering & Pipelines: Python, SQL, data ingestion, data cleaning, transformation, data modelling, ETL workflows, EDA, feature engineering
- Analytics & Visualization: Power BI, Advanced Excel, dashboard design, statistical analysis, KPI & trend reporting, Matplotlib, storytelling with data
- AI / Gen AI: Generative AI, LLMs, Prompt Engineering, RAG (conceptual), agentic multi-step workflows, Scikit-learn, supervised ML, AI output quality evaluation
- Cloud & Automation: AWS Cloud Foundations, AWS Billing & Cost Management, Linux (Red Hat RH104), UiPath RPA (Studio, UI Automation, Excel Automation), Vercel/Render deployment
- Data Governance & Quality: data quality checks, documentation, audit/verification reporting, secure data handling, version control (Git/GitHub)
- Integration & Delivery: RESTful APIs, MongoDB, low-code/no-code exposure, Postman, Jupyter Notebook, VS Code
- Stakeholder & Program Skills: cross-functional collaboration, technical-to-business translation, customer focus, structured problem-solving, time management

PROFESSIONAL EXPERIENCE

Generative AI Intern — SystemTron, Chennai, India *Jul 2025 – Aug 2025*

CID: ST/INP/9664

- Built and deployed Generative AI models to automate and optimize content workflows, gaining hands-on experience with LLM-based data and automation pipelines.
- Applied prompt engineering techniques and Gen AI tooling to real-world business use cases, including chatbot and content-generation workflows.
- Partnered with cross-functional team members to evaluate AI model outputs for quality, relevance, and accuracy — supporting data-driven decision-making and responsible AI adoption.
- Gained exposure to multi-step agentic workflows, synthesizing model outputs into structured insights for business processes.

Full Stack Web Development Intern — ThinkBright EdTech LLP *Jun 2025 – Jul 2025*

Tiruttani, Tamil Nadu, India

- Developed a full-stack web application (React.js, Node.js/Express.js) with RESTful APIs and CRUD operations against a MongoDB database, applying core data integration and API design principles.
- Built responsive UI components and implemented multi-page routing; deployed to Vercel and Render, configuring environment variables for secure connections.
- Used Git/GitHub for version control and collaborative code review; debugged cross-browser and API issues and tested endpoints with Postman.
- Communicated technical findings clearly to both technical and non-technical stakeholders to drive timely resolution.

RELEVANT PROJECTS

AI Business Intelligence Dashboard *2025*

- Designed and built an AI-powered BI dashboard combining Python-based data processing with Power BI for real-time KPI and trend reporting — directly aligned to dashboard/decision-support solutioning.
- Automated data gathering, cleaning, and transformation workflows, improving data accuracy and reducing manual reporting effort for business stakeholders.

- Incorporated AI-driven analysis, including predictive trends and anomaly detection, to surface actionable insights for data-driven decisions.

Customer Churn Prediction — Telecommunications Industry *2025*

- Built an end-to-end ML pipeline (data cleaning, EDA, feature engineering) in Python to predict customer churn from a telecom dataset.
- Trained and compared classification models (Logistic Regression, Random Forest) using Scikit-learn; evaluated with accuracy, precision, recall, and F1-score.
- Visualized churn drivers and customer segments in Power BI, translating model outputs into actionable retention insights for stakeholders.

Secure Data Wiping System — Capstone Project *2025 – 2026*

- Developed core engine for multi-pass data wiping algorithms (3-pass and 7-pass configurable overwrite patterns) ensuring irreversible data destruction.
- Built an integrated recovery-testing and verification module; generated automated audit and compliance reports — reinforcing data governance and quality-assurance practices.

Full Stack Web Application — ThinkBright EdTech Internship Project *Jun – Jul 2025*

- Built a full-stack CRUD application (React.js, Node.js/Express.js, MongoDB) exposing RESTful APIs tested via Postman.
- Connected frontend to backend with Axios for real-time data handling; deployed with secured environment variables via Git/GitHub.

EDUCATION

Bachelor of Engineering — Computer Science and Engineering *2022 – 2026*

- CGPA: 8.3 | Chennai, India

HSC — Higher Secondary Certificate *2020 – 2021*

- Percentage: 65% | Tamil Nadu, India

CERTIFICATIONS

- AWS Academy Graduate: AWS Academy Cloud Foundations (20 hrs) — AWS Academy, Nov 2024
- AWS Foundations: Getting Started with AWS Cloud Essentials — AWS Training, Nov 2024
- AWS Billing and Cost Management — AWS Training, Nov 2024
- Getting Started with Linux Fundamentals (RH104) — Red Hat Academy, May 2026
- Command Line in Linux — Coursera Project Certificate, Jan 2026
- Create Your First Web App with Python and Flask — Coursera Project Certificate, Dec 2023
- UiPath Automation Explorer for Students – Skill-a-thon 2024 — UiPath Academic Alliance & ICT Academy
- Explore Automation Development with UiPath Studio — UiPath, Apr 2024
- Build Your First Process with Studio — UiPath, Apr 2024
- Variables, Constants and Arguments in Studio — UiPath, Apr 2024
- Control Flow in Studio — UiPath, Apr 2024
- User Interface (UI) Automation with Modern Design in Studio — UiPath, Apr 2024
- Excel Automation with the Modern Experience in Studio — UiPath, Apr 2024
- Spring REST — Infosys Springboard, Oct 2025
- Spring 5 Basics with Spring Boot — Infosys Springboard, Oct 2025
- Spring Data JPA with Boot — Infosys Springboard, Oct 2025
